

TSHENOLO MATOME

Address : 214 Block Y Soshanguve 0152
Phone number: 0710741854/0725170949
Email address : tmatome@gmail.com

As a committed and proficient full stack developer, my primary goal is to excel in my role and make meaningful contributions to the technology industry through my expertise. I am dedicated to honing my skills by seeking guidance from seasoned developers, enrolling in online courses, maintaining a humble attitude, and consistently pushing myself to acquire comprehensive knowledge in the field of software development.

EXPERIENCE

01 AUGUST 2022 – DATE

SOFTWARE ENGINEER, SAGE SA

As a Software Engineer specializing in payroll systems, I am responsible for designing, developing, and maintaining robust software solutions tailored for efficient payroll processing. My role involves collaborating with cross-functional teams to gather and analyze requirements, ensuring compliance with relevant tax and regulatory standards.

01 JANUARY 2019 – 31 JULY 2022

FULL STACK SOFTWARE DEVELOPER, RETRO RABBIT

Problem Solving
Produce clean, efficient code based on specifications
Integrate software components and third-party programs
Verify, test and deploy programs and systems
Troubleshoot, debug and enhance existing software
Recommend and execute improvements
Client communication
Continuous professional development

01 DECEMBER 2017 – 31 DECEMBER 2018

SUPPORT ENGINEER, PHAROS AVANTGARD

Unstructured Supplementary Service Data (USSD) support like *141# now *136# and airtime recharge systems to name few.

01 JULY 2014 – 31 NOVEMBER 2017

SERVER ENGINEER, KHAULEZA IT SOLUTIONS

General IT support for all computer hardware and software related issues.

EDUCATION

APRIL 2023

BSC HONS COMPUTING, UNISA

Computing is an umbrella term that includes both Computer Science and Information Systems. Bachelor of Science Honours degree in Computing therefore includes modules in Information Systems and Computer Science.

MARCH 2016

BSC APPLIED MATHS AND COMPUTER SCIENCE, UNISA

The degree equips you with a comprehensive foundation in the physical, mathematical, and computer sciences. The program aims to produce graduates who possess a systematic and coherent body of knowledge, a deep understanding of underlying concepts and principles, and the ability to critically evaluate scientific information. Additionally, it emphasizes the development of high-level cognitive and generic skills, including problem-solving, effective written and spoken communication, and computer literacy.

DECEMBER 2005

MATRIC, NCHAUPE HIGH SCHOOL

The program aims to equip graduates with the knowledge and skills necessary for higher education or entry into the workforce. Successful completion of Matric signifies readiness for academic pursuits, professional endeavors, and continued personal development.

SKILLS

Web Technologies

HTML5/CSS3
TypeScript
Node.JS
Angular
Reactjs
Vuejs

Programming Languages

C#
C/C++
Java
Flutter
Python
Erlang

System & Networking

Version Control
Continuous Integration
Unix/Linux Systems
Networks Administration
Virtualization

Databases

MS SQL
MySQL
Postgre
MongoDB
Redis

Software Development Practices

UML (Unified Modeling Language)
Test-Driven Development (TDD)
Agile Methodology
